BRIEF INFORMATION ABOUT MR.ANIL MHASKE

MANAGING DIRECTOR DATA CARE CORPORATION

For DCC, you, the customer comes first in a priority list. We understand that we will exist and prosper only because of the customers.
We will focus on delivering the best quality. We will respond to the changing needs and expectations of our customers speedily, courteously and effectively.
We have many dreams and I am sure with our ‘can do spirit’ we will not simply chase our dreams rather we will live them. Let us join together for living our dreams with a larger aim to empower the growth of our great Nation.

Mr. Anil Mhaske
Managing Director
Data Care Corporation

Anil Mhaske

Anil Mhaske is the founder and Managing Director of Data Care Corporation (DCC), a prominent IT services and distribution company based in Pune, India. Established in 1992, DCC has grown significantly under his leadership, offering a wide range of services and expanding its presence across multiple cities in Maharashtra, including Mumbai, Nashik, Nagpur, and Aurangabad. DCC provides IT infrastructure solutions, distribution of consumer electronics and computer hardware, retail services through exclusive brand outlets, and enterprise services including Annual Maintenance Contracts (AMC) for large institutions and government clients like the Reserve Bank of India and various public sector banks.
Mhaske's leadership has emphasized strong customer service, competitive pricing, and extensive partner networks, allowing the company to become a major player in IT distribution and service sectors in India. DCC's offerings span across IT infrastructure, electronics distribution, home automation, and even real estate through its DCC Developers division. Notably, DCC is also an authorized distributor for brands like Dell, HP, Lenovo, and LG and has a strategic focus on building robust distribution channels across smaller cities and towns, which has been key to its substantial growth and expansion beyond Pune.

The competitive strength of a company should be measured not by the volume of sales or the range of innovation, but by the extent of involvement of all the association in the quality improvement process.
DCC is delighted to share with you a feeling of joy for self and a feeling of indebtedness to you that because of your unstinted support
I take this opportunity to thank our valued customers, whose continued patronage and confidence in our products inspires us to extend the best of services and enables us to provide value for their money.
We plan to achieve this goal through our strength - the Employees; and seek their continuous involvement in achieving the Company's objectives.
I therefore, seek continued patronage of our valued customers, cooperation of our employees and thank our well-wishers who have contributed to the growth of the organization.
As we look the road ahead, we are determined to exceed our historical success. And we'll do it by constantly increasing the value of our offerings to our customers and increasing the caliber of our services to such a high level, that our name will become synonymous with customer satisfaction.
I strongly believe in working for the community around me and that is what DCC is all about. Through DCC’s network, we try and touch our client’s day-to-day life by equipping them with the latest technologies at the reasonable price.

SSLv3/POODLE

This site does not support the SSL version 3 protocol.

More information about SSL version 3 and the POODLE vulnerability.

Heartbleed

The site did not offer the Heartbeat TLS extension prior to the Heartbleed disclosure, and so was not exploitable.

This test does not exploit the Heartbleed vulnerability but uses information from conventional HTTPS requests. More information about Heartbleed detection.

Sender Policy Framework

A host's Sender Policy Framework (SPF) describes who can send mail on its behalf. This is done by publishing an SPF record containing a series of **rules**. Each rule consists of a qualifier followed by a specification of which domains to apply this qualifier to. For more information please see **open-spf.org**.

LEARN MORE REPORT FRAUD

Sender Policy Framework

A host's Sender Policy Framework (SPF) describes who can send mail on its behalf. This is done by publishing an SPF record containing a series of **rules**. Each rule consists of a qualifier followed by a specification of which domains to apply this qualifier to. For more information please see **open-spf.org**.

Warning: It appears that this host does not have an SPF record.

Setting up an SPF record helps prevent the delivery of forged emails from your domain. Please note that an SPF record will only protect the domain it is added to and not any **mail-enabled subdomains**. It is recommended to add an SPF record to any subdomain with an MX record.

DMARC

DMARC (Domain-based Message Authentication, Reporting and Conformance) is a mechanism for domain owners to indicate how mail purporting to originate from their domain should be authenticated. It builds on SPF and DKIM, providing a method to set policy and to give reporting of failures. For more information please see **dmarc.org**.

This host does not have a DMARC record.
